

MOZART

DISPLAY CASE FOR PRALINE

The new born MOZART for praline **with humidity controller.**

Show case with ventilated refrigeration, +14/+18°C working temperature, with electronic control of temperature and humidity. 1400 mm standard length (other lengths on request). The counter is composed by AISI 304 stainless steel basin, insulated with low-density ecological polyurethane, with display deck in stainless steel with steps (it could be equipped with no. 21 200x200 mm trays for praline). The glass framework with R.U.V. stick glasses. Back doors in curved glasses with pvc film treatment are sliding and easy to remove. Work surface in white okite. Evaporation system with R404A-valve, with electronic control unit with EWHS humidity feeler for taking the exact percentage of humidity. Basement in beige melaminic wood, with two neutral drawers and open compartment (it could be equipped with built-in motor). With adjustable feet (revolving wheels with brake on request).

The standard counter is supplied without decoration panels in order to permit to our client to personalize it.

As optional it's possible to demand the built-in motor, the decoration panels as photo: panels in Aplikord laminate, wengé colour in the front and in the end-sides, or other colours, with inserted part in white colour or other colours on request, with stainless steel or laminate plinth.
